

## APPENDIX A: LIST OF NPIAS AIRPORTS

### EXPLANATION OF TERMS AND ABBREVIATIONS USED IN APPENDIX A

State	State, District of Columbia, or territory (Puerto Rico, Virgin Islands, Guam, American Samoa, and Northern Mariana Islands).
City	The city generally associated with the airport.
Airport	The official name of the airport or designated abbreviation.
LocID	The unique airport location identifier for an airport.
Ownership	Indicates airport ownership: PU – Public PR – Private M – Military (Army, Navy, Air Force, Coast Guard) NA – Native American
Category (Svc Lvl)	There are four statutory airport categories, also referred to as service level, which describes the type of service the airport currently provides to the community. These categories may affect the Federal funding. P – Commercial Service – Primary CS – Commercial Service – Nonprimary R – Reliever Airport GA – General Aviation Airport <u>1</u> indicates an FAA-licensed commercial spaceport collocated with a public-use NPIAS airport accommodating aviation and space operations (8).
Hub	The term “hub” is defined in statute to delineate commercial service airports based on percentage of total passenger enplanements (see appendix C for further details). Primary commercial service airports are divided into four hub categories: L – Large Hub M – Medium Hub S – Small Hub N – Nonhub
Role	Facilities serving mostly general aviation operations were placed in categories based on current activity measures (e.g., number and type of based aircraft and volume and type of flights). Nonprimary airports are divided into five roles: National Regional Local Basic Unclassified
Enplaned	The number of revenue passengers that boarded aircraft at the airport during CY21 (FY23).
Based Aircraft	The number of registered aircraft hangared or based at the airport. Included in these counts are single engine, multiengine, jets, and helicopters as reported by the airport and verified through the N number registry. Not included in these totals are military aircraft, ultra-lights, gliders, and balloons.
Development Estimate	The 5-year estimate of airport improvements that are eligible for Federal funding. Not included in these estimates are 5-year costs associated with planning (approximately \$410 million).
Type of New Airport	A new airport includes: replacement, supplemental, or additional airport. A new airport may also be a military facility converted to civilian/joint use. New airports (planning sites) under development and expected to open beyond 2027 are not shown in Appendix A.

*Note:* The category and hub were based on calendar year 2021 enplanement data. See Appendix C for information on Role determination. Development estimates were largely gathered in 2021 through April 2022.

## AIRPORT SUMMARY BY STATE

State	Total Airports	Private Use	Public Use	Total Existing NPIAS Airports
Alabama	322	235	87	73
