AFS-130: General Aviation Branch

Henrique Mendes: *Manager*

Office: 401-429-3105

- Type Certification Boards
- Maintenance Review Boards and evaluation of ICAs for assigned fleet types
- End-user perspective to certification activities

Under Part 23 and 25:

- Aircraft Type Certificated that serve in General Aviation and Part 135 operations
- MRB, FSB, FOEB, and acceptance of ICA
- Continued Operation Safety of aircraft and associated systems

AFS-140: Rotorcraft Branch

James Kline: *Manager*

Mobile: 206-304-1065

- Type Certification Boards
- Rotorcraft and powered-lift recommendations from the NTSB, AVP and CHDOs

Under Part 27 & 29:

- Aircraft Type Certificated that serve in General Aviation and Part 135 operations
- MRB, FSB, FOEB, and acceptance of ICA
- Continued Operation Safety of aircraft and associated systems

AFS-150: Propulsion Systems Branch

Eduard Stalzer: *Manager*

Office: 781-238-7523

- Aircraft/Engine minimum maintenance requirement and continued airworthiness/MRB
- Continued Operation Safety
- Acceptance of initial and revised ICA
- Recommendations for Engines, Propellers, and APUs
- Manage and evaluate the Extended-range Twin-engine Operational Performance Standards (ETOPS) Database
- Provide assistance with AIR support for Correlation, Operation, Design, And Modification of Engine Test Cells

AFS-160: Standards and Policy Branch

Robert Duffer: *Manager*

Office: 206-231-3774

- Office of Responsibility for all AED Policy
- Introduce new and revised 8900.1 guidance

AFS-405: Organizational Effectiveness

Julie Webb: *Manager*

Office: 405-954-0087

To ensure consistency, interdependence, critical thinking, and agility across the division through implementation of safety programs, risk management, professional development, and communications.

- Contribute to the division's organizational health
- Ensure consistent and quality maintenance and implementation
- Manage professional development efforts for the division
- Conduct strategic planning for the division

AFS-410: Flight Operations Group

James Marks: *Manager*

Office: 202-769-8890

Develop safe Communication, Navigation, and Surveillance and air traffic management operations using existing & emerging technologies and innovative operational concepts.

- Develop, analyze, provide technical guidance, and implement policies, standards, criteria, requirements, specifications, limitations, applications, and approvals on:
 - Instrument flight operations
 - Performance-based navigation
 - Integration of new & emerging technologies
 - Implementation of NextGen
 - Special areas of operation
 - New entrants
- Represent Flight Standards in international meetings and liaisons with foreign CAAs to foster global safety standards

AFS-420: Flight Procedures & Airspace Group

Romana Wolf: *Group Manager*

Mobile: 603-881-1138

Ensures safe and efficient flight paths from takeoff to landing and provides operational safety reviews and support to the NAS

- Establishes instrument design and procedures for departure; en route; arrival and approach; and obstacle clearance standards, criteria, and policy
- Develops, analyzes and approves non-standard criteria, waivers from standards, and special instrument procedures
- Provides operational safety reviews and develops requirements to support Air Traffic and Airports to ensure and sustain acceptable levels of safety

AFS-430: Flight Research & Analysis Group

Jacob Powers (A): *Manager*

Mobile: 405-954-6013

Provides leadership by defining and independently conducting aviation safety research, while collaborating with the global aerospace research community on existing and emerging flight technologies and operational concepts.

- Manages the Flight Operations Simulation Laboratory, provides real-time, realistic, dynamic virtual operations to observe and evaluate pilot-controller-aircraft interface and performance data in a defined or generic environment
- Assesses the safety of new, emerging & modified flight operational concepts & systems to improve flight operations, standards, capacity & aviation safety in the NAS
- Serves as the Flight Standards focal point for human factors issues regarding new flight technologies implementation
- Supports safety analyses for AVS, NextGen, ATO, ARP, Industry, other government agencies & DoD
