

FEDERAL NO DRONE ZONE TOOLKIT

America250 Events

PURPOSE

Unauthorized drone activity threatens public safety at America250 events. The Federal Aviation Administration (FAA) will create No Drone Zones around many America250 events.

This U.S. federal government toolkit provides messaging, graphics and other resources to help communicate that large America250 events will have strict No Drone Zones.

It is important that our state, local and private sector partners use consistent messaging and that the graphics and/or signage have a standard and consistent look for brand recognition.

This campaign focuses on deterrence, awareness, and enforcement through coordinated federal, state, and local efforts.

PRIMARY MESSAGES TO SHARE/AMPLIFY

- America250 events are No Drone Zones.
- Flying drones near these events is illegal and dangerous.
- Violators will be prosecuted and penalties are severe.
- Leave your drone at home.
- There will be severe consequences for reckless, careless, or criminal drone use, including fines upwards of \$100,000, criminal charges, incarceration, and the confiscation of your drone.
- See a drone breaking the rules? Report it to 911, on-site law enforcement, or the FBI at 1-800-CALL-FBI.
