

COVID-19 Medication

(Updated 10/26/2022)

I. CODE OF FEDERAL REGULATIONS - 67.113(b)(c); 67.213(b)(c); 67.313(b)(c)

II. MEDICAL HISTORY: Item 48. General Systemic

The use of medications below may be acceptable if there are no side effects (localized or systemic) which could interfere with aviation safety, and the applicant is otherwise qualified.

III. AEROMEDICAL DECISION CONSIDERATIONS:

See Item 48. General Systemic, [COVID-19 Infections](#)

IV. PROTOCOL: None

V. PHARMACEUTICAL CONSIDERATIONS:

- FDA- or EUA-approved COVID-19 medications are acceptable.
- COVID-19 medications require a post-dose observation time, due to side effects which may affect aeromedical safety.
- NO safety-related duties permitted DURING COVID-19 infection.
- Follow the current [CDC](#) and [FAA guidelines](#) for recovery from COVID-19 before return to duty or flying.
- Also, see [COVID-19 vaccines](#).

Q: Which COVID-19 medications can I use and still fly? **A: None. You cannot take a medication and fly or perform safety-related duties.** See the chart below for more information.

Conditionally ACCEPTABLE	Post-dose Observation* and Additional Requirements
COVID PRE-EXPOSURE PROPHYLAXIS Used only for individuals who are not currently infected with the SARS-CoV-2 and who have not recently been exposed. ✓ tixagevimab + cilgavimab (Evusheld)	No pilot or safety-related duties for 4 hours after dose (due to hypersensitivity).
COVID TREATMENT or POST- EXPOSURE PROPHYLAXIS Any FDA-approved treatments below are acceptable, however, the following restrictions apply: • DO NOT fly if taking ANY medications listed until ALL items (#1-4) in the next column are met; and • DO NOT fly if symptomatic or infected. Currently FDA approved treatment(s)* ✓ bamlanivimab + etesevimab (no brand name) ✓ bebtelovimab (LY-CoV1404) ✓ casirivimab + imdevimab (Regen-COV) ✓ molnupiravir (no brand name) ✓ nirmatrelvir + ritonavir (Paxlovid) ✓ remdesivir (Veklury) ✓ sotrovimab (no brand name) *This list updated as of 04/27/2022. This list may change. Contact your AME if you have questions regarding newer, FDA-approved medications.	ALL of the following criteria must be met BEFORE returning to flight status or safety-related duties: 1. Wait 24 hours after the last dose of COVID-19 medication; AND 2. Be free of significant side effects after any COVID-19 medication; AND 3. Meet the current CDC/FAA guidelines for recovery from COVID disease or exposure; AND 4. Meet the requirements on the COVID-19 Disposition Table. 14 CFR 61.53 applies after any medication use or illness.
