DISEASE/CONDITION	EVALUATION DATA	DISPOSITION
A. Any history	Submit the following for FAA review: 1. A current, detailed neurological evaluation, in accordance with the FAA Specifications for Neurologic Evaluation, generated from a clinic visit with the treating neurologist no more than 90 days before the AME exam. 2. It must include and evaluation of items such as balance, strength, range of motion limitations and pain. It must describe any functional deficits or limitations for both large and small muscle groups as well as dexterity to operate an aircraft. 3. All school/academic records: Educational accommodations, Individual Education Plan (IEP) such as a "504" plan, educational support services provided, educational assessments and testing associated with IEP or individualized accommodations, neuropsychological assessments and testing, educational transcripts, and, if available, chief pilot reports. Note: In some cases, additional information such as brain imaging (MRI/CT) or neurocognitive testing may be required after review of the above items. Physical limitations associated with CP may require a Medical Flight Test (MFT). If a MFT is required, please state which FSDO the individual would prefer to use.	DEFER Submit the information to the FAA for a possible Special Issuance.
