Dynamic Regulatory System (DRS)

The Dynamic Regulatory System (DRS) is a comprehensive Knowledge Center of Regulatory and Guidance material from the Office of Aviation Safety and other services and offices. DRS is cloud based and can be accessed by any device that has Internet capability. Some document types within DRS are restricted to only FAA employees and contractors.

Iceland-Greenland Surveillance Corridor

The Blue Spruce Routes are no longer available as of March, 2025. Aircraft with a single long range navigation system and ADS-B may cross the NAT using the Iceland-Greenland Surveillance Corridor. See the following links

Streamlined Part 91 Process

The Streamlined Part 91 Operational Approval is an innovative process for obtaining or amending up to ten commonly requested Part 91 Letters of Authorization (LOAs) when purchasing a new aircraft directly from the aircraft manufacturer. Aircraft manufacturers, training providers, manual vendors, and FAA policy experts collaborate to streamline the operational approval process for the operator and inspector.
