Federal Aviation Administration

Systems Engineering and Technical Innovative Solutions (SETIS)

Pre-Award Briefing

September 2026

Welcome to SETIS

Agenda

- SETIS Overview
- Pre-Award Process
  - Scope
  - Engagement Process
  - Task Order Competitions
- Post-Award Administration
- Background Information
  - Awardees and Subcontractor Teams
  - Points of Contact

SETIS Overview

- Systems Engineering and Technical Innovative Solutions (SETIS) is a new contract portfolio awarded as a 10-year indefinite delivery/ indefinite quantity (IDIQ) contract to 10 small and 5 large business prime multi-vendor teams with a shared ceiling value of approximately $2.3 billion
- SETIS is one of the largest contract portfolios the FAA has ever awarded and replaces and consolidates the SE2020 and SE2025 contracts
- SETIS provides a broad range of research, service analysis, strategic planning, systems engineering, technical, financial and programmatic support services to support NAS, Mission Support systems, and other related aviation mission objectives
- SETIS is open to all LOBs as an FAA-wide contract vehicle
- The SETIS contracts were awarded with a period of performance from July 1, 2022 to June 30, 2032

SETIS Fast Facts

Prime Awardees	<u>Small Business</u> • A3 Technology • Advanced Sciences and Technologies (AS&T) • ATAC Corporation • Cavan Solutions • Concept Solutions • Crown Innovations • Enroute Computer Solutions • JMA Solutions • Mosaic ATM • Veracity Engineering	<u>Large Business</u> • Astrion Group (formerly Oasis Systems) • Booz Allen Hamilton • LS Technologies • Noblis • SAIC
Total No. of Contract Awardees	303 (includes primes and subcontractors)	
No. of Task Orders Awarded to Date	96	
Value of Awards to Date	$1.1 billion	
Total Award Baseline	$2.3 billion	
Period of Performance	10 yrs (3 year Base period with a 3 year option period and two 2 year option periods)	
Standard Terms	Time & Materials, task order, term contract with allowance for cost plus - fixed fee, firm fixed-price, labor, cost-plus award fee components	

SETIS Benefits

- No Fee for using the SETIS portfolio
- SETIS Program Office (PO) provides certified CORs to manage TO administration, enabling our Customers to focus on task objectives. PO responsibilities include:
  - Invoice Acceptance
  - Maintaining Financial Records
  - CPARS entry
- Access to top industry talent with both AC and DC based vendors and other locations
- Pre-qualified, integrated and experienced multi-vendor teams
- Provides comprehensive breadth of support services from initiation up to implementation
- Streamlined competition process expedites task order awards
- Competitive pricing providing Best Value for the Government
- Engagement Advisors assigned to support development of PWS, IGCE, TC Input for T&M Determination form (if required) and CIO IT Procurement Review and Approval form (if required)
- Pre-award SCRB review replaced with post-award Quarterly CFO review

SETIS Program Governance

- **Customer [Technical Customer (TC)]** – define Task Order requirements, provide funding (generally), oversee day to day performance, and review vendor work products and deliverables

- **SETIS Program Office** – ensure orderly and timely control and administration of SETIS contracts generally and Task Orders specifically
    - Program Manager – responsible for Program oversight
    - CORs – provide technical direction and financial oversight
    - Engagement Team – assists customers in preparing PWS, IGCE, TC Input for T&M Determination Form (if required), CIO Form (if required), and PR and answering questions from initial meeting through Task Order award

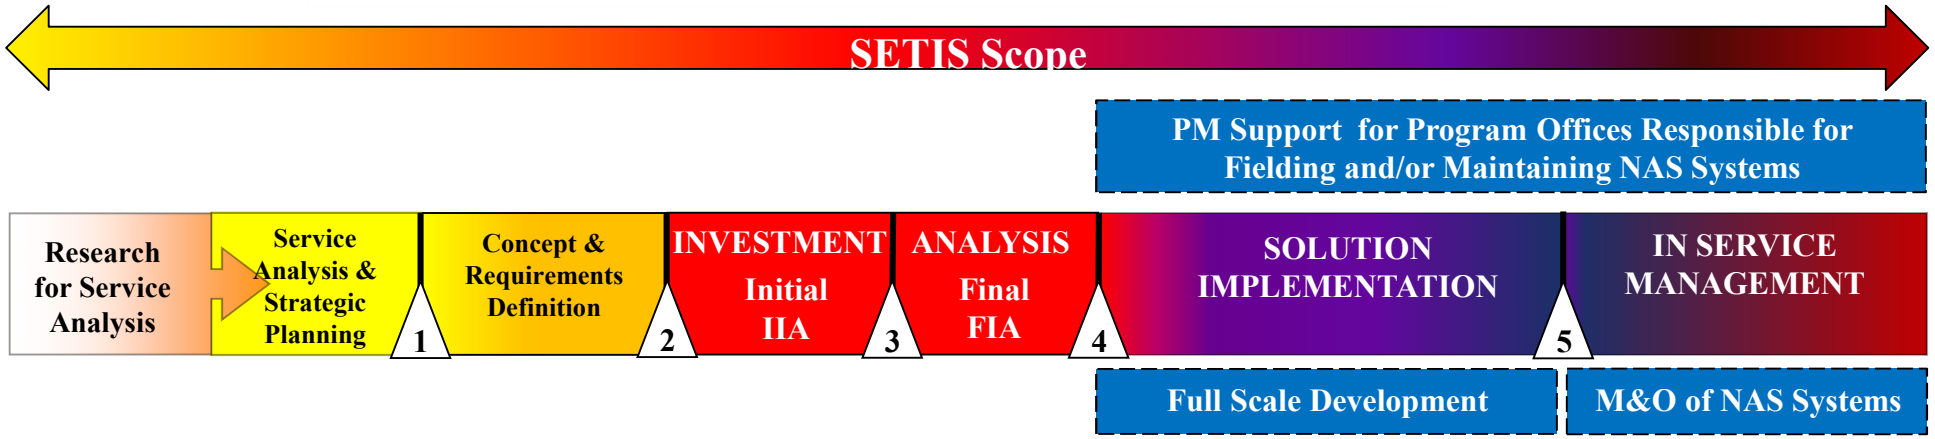

- **Contracting Office** – provides full suite of procurement and contract management actions

- **Legal** – provides full suite of program and contract advisory functions

SETIS Scope

SETIS Scope

SETIS scope* covers all AMS Lifecycle activities except for:

- Full Scale Development
- Maintenance & Operations of NAS Systems
- Program Management Support for Program Offices responsible for fielding and/or maintaining NAS Systems

**** Note SETIS also includes support for activities outside the scope of the AMS Lifecycle for NAS, Mission Support, and Aviation Related Activities***

Federal Aviation Administration

SETIS Tasking Requirements

- System Engineering Management
- Innovation Support Services
- System Requirements and Definition
- Analysis, Design, and Integration
- Value Engineering
- Supportability, Maintainability, and Reliability Engineering
- Quality Assurance and Quality Control Program
- Configuration Management
- NAS and Mission Support Information Security Support
- Technical, Engineering, and Scientific Support
- System Safety Engineering and Management
- Other System Engineering Specialties
- NAS and Mission Support Enterprise Architecture Support
- Technology Opportunities Support
- Test Resources
- Lab Facilities
- Investment Portfolio Management
- Lifecycle, Earned Investment and Business Case Analyses
- Forecasting and Strategy Development
- Business Planning
- Performance Analysis
- NAS Modernization Information Technology (IT) Support
- Policy Studies
- Program Planning and Financial Management
- Program Management Support
- Program Management System Tools
- Information Systems Development and Maintenance
- Training
- Business Process Re-engineering (BPR)
- Aircraft Certification
- Software Engineering
- Verification & Validation (V&V) Program
- Horizon Scanning, Technology Scouting, and Market Analysis
- Demand for National Airspace System (NAS) Services Support
- Identified Projected Supply of Services
- Mission Needs Analysis & Assessment Support
- Future NAS Research & Development Portfolio Optimization

SETIS Core and Additional Capabilities

Core Capabilities

- Avionics Systems
- Commercial Space
- Cybersecurity
- Enterprise Architecture Products & Enterprise Services
- Integrated Laboratories & Operations
- Trajectory Based Operations (TBO)
- Unmanned Aircraft Systems (UAS)
- Air Traffic Management (ATM) Automation
- Communications, Navigation, and Surveillance (CNS)

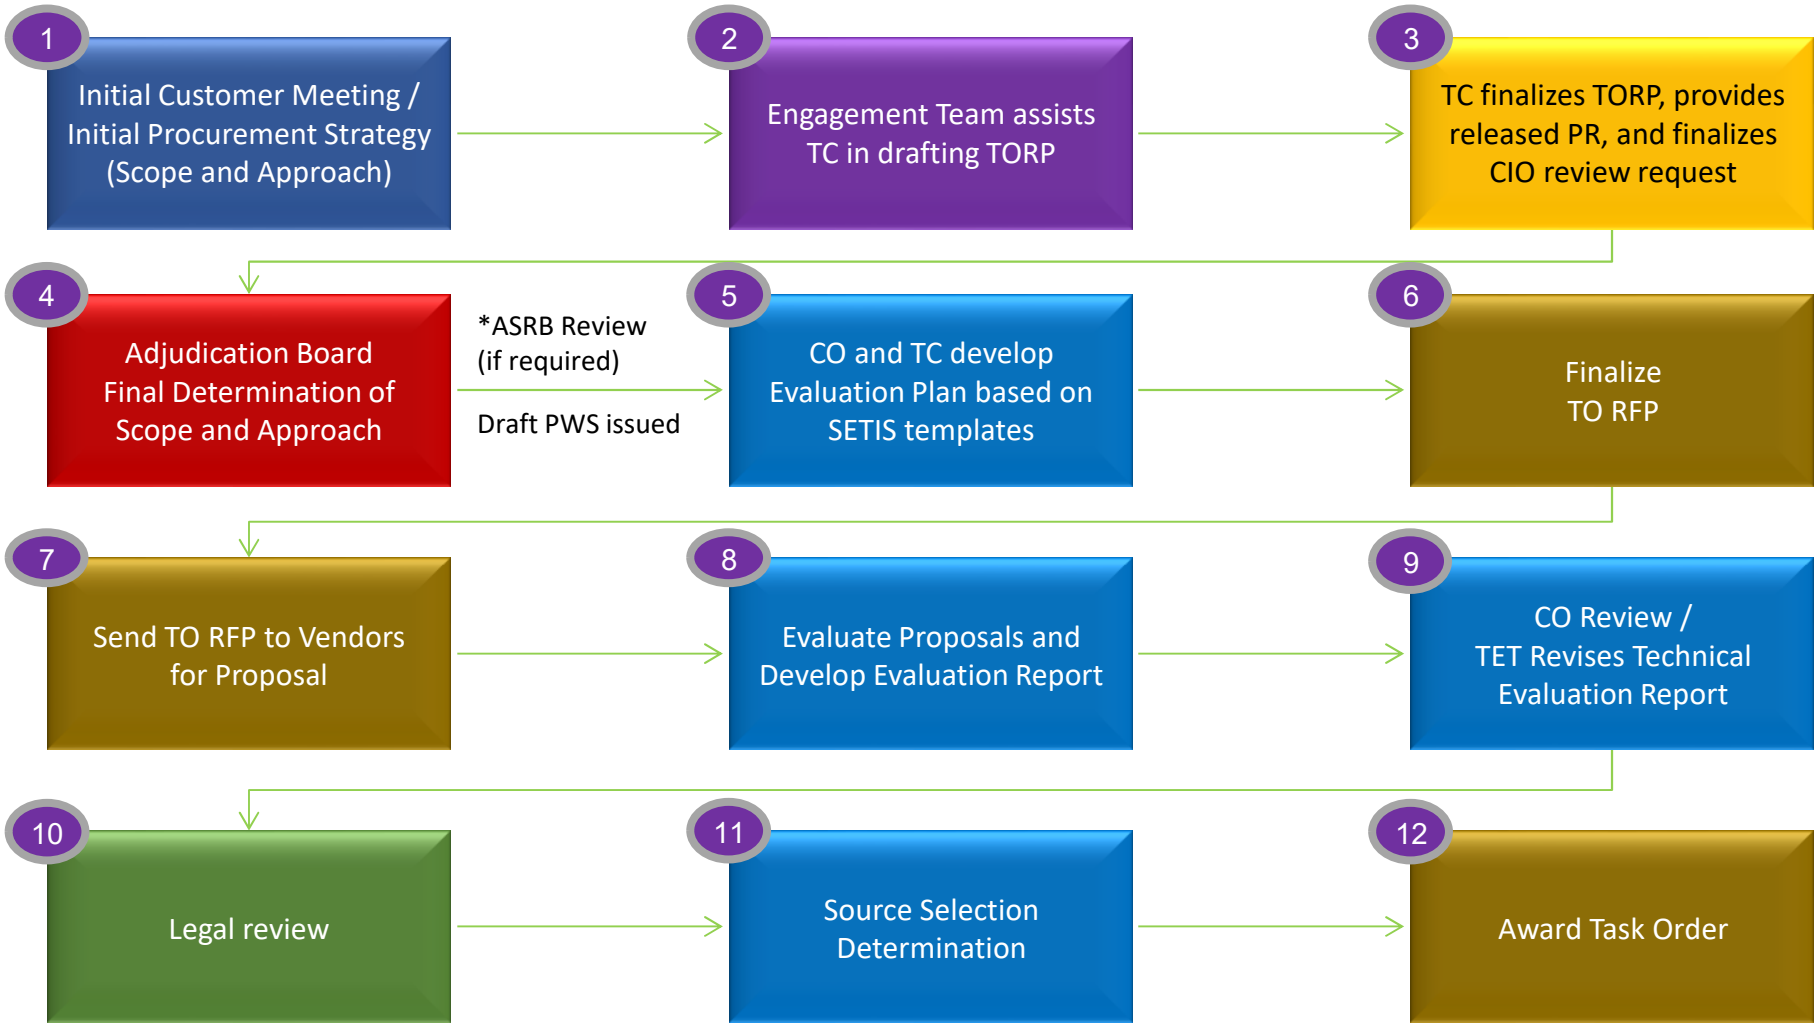

Additional Capabilities

- Air Traffic Rules and Procedures
- Airspace Design and Analysis
- Cost Benefit Analysis
- Modeling and Simulation
- Human Factors
- Human-in-the-Loop Simulations
- Information Technology
- Investment Analysis
- NAS Air Traffic Facilities
- Information Management Services (IMS)
- Operational Concept Development and Validation
- Aerospace Medical
- Program Planning and Financial Analysis
- Security
- Service-Oriented Architecture
- Standards Development
- NAS System Safety
- Weather
- Environmental Analysis
- Systems Engineering & Integration
- William J. Hughes Technical Center (WJHTC) Laboratory Operations
- Airplane Modernization and Manufacturing (Large – 14 CFR Part 25 and other applicable Parts) Support Services*
- Airplane Modernization and Manufacturing (Small - 14 CFR Part 23 and other applicable Parts) Support Services*
- Large Scale Demonstrations*
- Rotorcraft Modernization and Manufacturing (Large – 14 CFR Part 29 and other applicable Parts) Support Services*
- Rotorcraft Modernization and Manufacturing (Small – 14 CFR Part 27 and other applicable Parts) Support Services*
- Simulators, Airplane (Large – 14 CFR Part 25 and other applicable Parts) Support Services*
- Simulators, Airplane (Large – 14 CFR Part 25 – Level C and D Fidelity and other applicable Parts) Support Services*
- Simulators, Rotorcraft (Large – 14 CFR Part 29 – Level C and D Fidelity and other applicable Parts) Support Services*
- System of Systems (SoS) Integration*
- Intelligent Automation and Artificial Intelligence (IAAI)/Machine Learning Systems
- Aviation Safety and Certification
- Performance-Based-Navigation (PBN)
- Cloud Computing
- Data Analytics (DA)

**Denotes Capabilities not required for Small Business Primes and their sub-teams*

Engagement Process

SETIS Engagement Process – Competition

Federal Aviation Administration

Task Order Competition Milestone Schedule

The following Milestone Schedule is an estimate based on prior actual awards and is contingent upon completion of previous milestones by the Projected Date.

Milestone	Projected Date	Workdays	Responsibility
Finalized PWS & IGCE, Released PR and CIO IT Procurement form submitted	2/7/25		TC*
Adjudication Meeting	**2/14/25**	**5**	**SETIS PMO, CO & TC**
ASRB Approval ($10M and above)**	**3/7/25**	**15**	**CO**
Prepare TO RFP	**3/14/25**	**5**	**CO**
TO RFP Approval	**3/21/25**	**5**	**CO**
Release TO RFP	**3/28/25**	**5**	**CO**
Proposals Submitted	**4/18/25**	**15**	**Vendors**
Individual Tech Eval Completed	**4/25/25**	**5**	**TC & Evaluators**
Technical Consensus Completed	**5/2/25**	**5**	**TC & Evaluators**
Technical Report Completed	**5/9/25**	**5**	**TC & Evaluators**
Cost Evaluation Completed	**5/2/25**	**10 from Proposal**	**CO**
CO Review and Revise Technical Report	**5/23/25**	**10**	**CO & Evaluators**
Legal Review	**6/13/25**	**15**	**Legal**
Address Comments and Finalize Report	**6/27/25**	**10**	**CO & Evaluators**
SSO Meeting	**7/11/25**	**10**	**CO & TC**
CO Preparation for Award	**7/21/25**	**7**	**CO**
Projected TO Award Date	**7/21/25**	**0**	**CO**
Work Days from ASRB Approval/Adjudication to Award:		97 to 112**	(Approx. 19 to 22** weeks)

19 - 22 weeks

PMO & TC*

CO & TC

**Note the TC is supported by the SETIS Engagement Team to complete these items*

***Note for TORPs not requiring ASRB, the TO Award timeframe is 19 weeks (97 workdays) from Adjudication to Award*

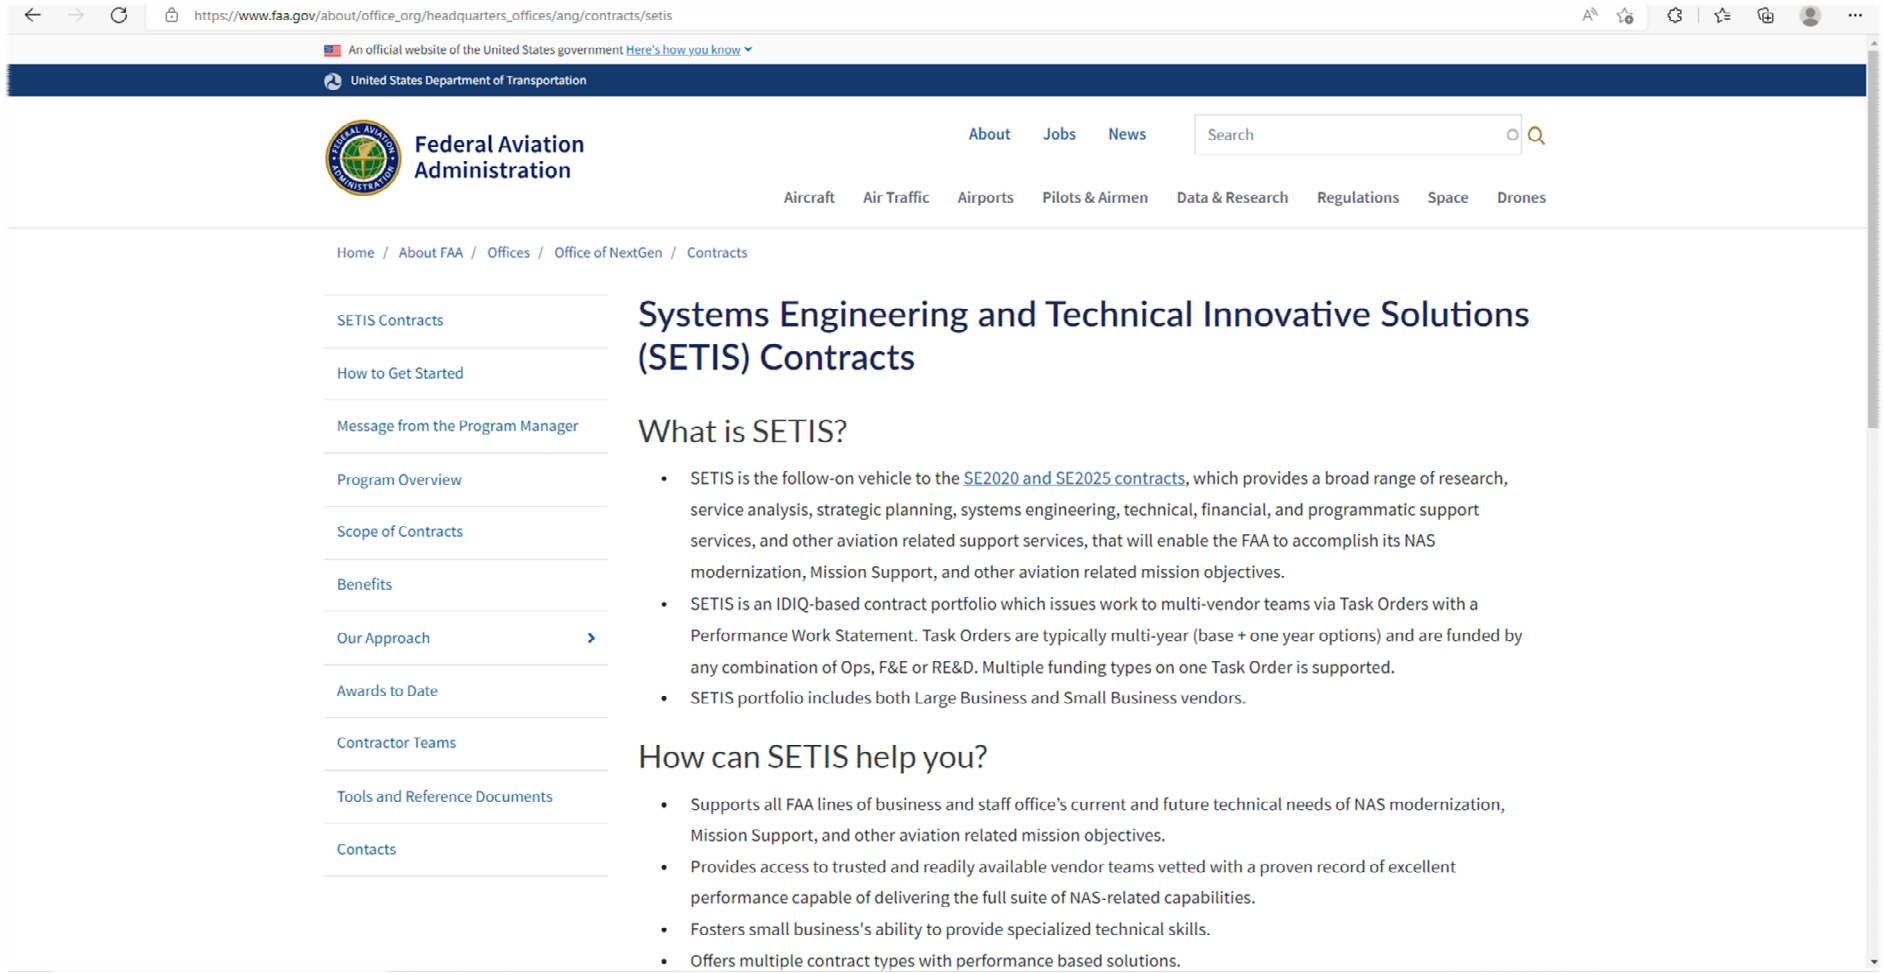

Requirements above $25M will require approximately 32 weeks to award after the ASRB meeting for additional CO and Legal review and documentation (not including potential risk or vendor protest)

TO Award Milestone Schedule Commitments

TO Award Milestone Schedule requires **commitment by the Customer** in these areas:

- Finalize PWS, IGCE, TC Input for T&M Determination Form (if required), CIO Authorization form (if required), and released PR assisted by the Engagement Advisor (EA)
- Attend Adjudication Board meeting and incorporate comments as appropriate assisted by the EA
- For Facility Security, TC must initiate DD-254 with AXF-200 by the Adjudication Board meeting date
- Finalize TO RFP and Evaluation Factors working with the CO
- Respond to pre-proposal questions according to schedule
- ***Identify and commit Technical Evaluation Team based on Evaluation Schedule provided by CO***
- Attend Technical Evaluation Team training and sign an NDA and Personal COI
- Complete the Technical Evaluation and Consensus on schedule
- **Majority of award delays are caused from not completing the Technical Evaluation Report timely and with quality**
- ***Clearly substantiate all evaluation ratings in the Technical Evaluation Report for each offeror's proposal in accordance with the TO RFP instructions***
- **All Technical Evaluation Reports require revisions to address CO and Legal review comments – plan accordingly**
- Attend the Source Selection Official meeting with the CO and assist in resolving any issues that may arise
- Attend Technical Customer Training and TO Kickoff Meeting

SETIS Website

Web Site address: http://www.faa.gov/go/SETIS

Federal Aviation Administration

Initial Customer Meeting

Meeting Agenda

- Meet and Greet TC/Alternate TC with non-conflicted Personal COI to discuss Customer Requirements
- Customer Requirements Discussion
- Initial Procurement Strategy
  - Scope: Research or Systems Engineering
  - Award Approach: Small Business Set-aside Competition or Full and Open Competition
- Pre-Award Briefing
  - Scope
  - Engagement Process
  - Task Order Competitions
- Initial Milestone Pre-Award Schedule
- IGCE Template based on Initial Procurement Strategy
  - Small Business Set-aside IGCE (Small Businesses only) vs. Full and Open IGCE (Large and Small Businesses) due to differing vendor labor rate schedules
  - For new TOs, the Labor Cost Estimate is based on the average ceiling labor rate across all SETIS vendors for that labor category/level
  - For follow-on TOs, the IGCE will be compared to previous actual invoiced costs for cost realism
  - Vendor proposals may differ from the IGCE due to average ceiling labor rate used as the basis of estimate

Task Order Requirements Package

- Task Order Requirements Package (TORP) consists of:
  - Performance Work Statement (PWS)
  - Independent Government Cost Estimate (IGCE) using J005 Labor Category definitions and specifying labor categories requiring a GFE laptop and/or PIV badge
  - Released Procurement Request (PR) following SETIS PR creation instructions
  - TC Input for T&M Determination Form (if required)
  - Chief Information Office (CIO) Form for IT services, HW, SW, etc. greater than $250K
- TORP contains Sensitive Unclassified Information (SUI) and is For Official Use Only not to be shared with anyone except FAA Task Order Team member employees in your organization without express written approval by the SETIS PM
- Do not share your draft/final PWS or IGCE with contractor support as there may be a potential Organizational Conflict of Interest (OCI)/Personal Conflict of Interest (COI)
- SETIS Engagement Advisor will work with your organization to develop the TORP for your new requirements

Adjudication Board (AB) Meeting

Meeting Agenda

- Funding Review
- Customer Requirement
  - PWS Review
  - IGCE Review
  - Data Rights
- Final Procurement Strategy Determination
  - Scope: Research or Systems Engineering
  - Award Approach: Small Business Set-aside Competition or Full and Open Competition
- Contract Type Determination
- OCI/Personal COI Review
- Identify Technical Evaluation Team
- Next Steps

Funding Guidance

- No Fee for using the SETIS portfolio
- Incremental funding is accepted subject to applicable fiscal law for severable service task orders
  - PR MUST BE created and released prior to the Adjudication Board meeting
  - Minimum 3 - 6 months funding required (~ ½ of Year 1 cost estimate)
  - A TO may have multiple Funding Types (e.g., F&E, RE&D, Ops); however, the TO must be structured to accept this prior to initial award
  - Once awarded, with limited exceptions a TO may not add/change Funding Type due to the Pick and Stick rule per CO/Legal
  - TOs may be created with a performance period of more than 1 year
  - Multiple-Years TOs are generally awarded with a one-year Base and multiple one-year Options for the out years

Fiscal Law Overview

- Anti-deficiency Act states the Government may not: obligate, spend, authorize obligations, or authorize expenditures…***Without having sufficient funds***
- Appropriations
  - Ops Funded: two (2) year appropriation, available for obligation during the fiscal year provided and subsequent fiscal year only
  - Crossing Fiscal Years: severable services may cross fiscal years only if the period of performance does not exceed one (1) year [the 12-month rule]
  - F&E and RE&D Funded: multiple year appropriations available for obligation for a period of up to three (3) fiscal years
  - The Task Order period of performance - not the obligation date of the funds - determines how far the funds may be used
  - Example: PR with funds expiring for obligation in September 2025 on current Option Period running from April 15, 2025 to April 14, 2026. Funds may cross fiscal year; however, funds must be expended by April 14, 2026 as cannot carryover to the next Option Period.

Fiscal Law Overview (continued)

- Bona Fide Needs Rule
  - Funds only available for definite period of time to meet real needs of that period
  - Analysis focuses on timing of obligation and whether the obligation is for a current Government need
- Severable Services
  - Services can be separated into components that independently provide value and meet an agency need
  - FUNDING: may be incrementally funded
  - Majority of TOs are severable
- Non-Severable Services
  - Services produce a single or unified outcome, product, or report
  - FUNDING: must be fully funded with funds available for obligation at the time of execution

Task Order Funding

- Post-Award Funding
  - CORs will contact TC when remaining funding reaches 40%
  - CORs need a released PR no later than 20 workdays prior to funding depletion date
  - Providing a released PR in a timely manner will avoid a break in service
  - Incremental Funding requires a Modification Package

- Funding Year considerations
  - Expiring funding limitations, i.e., may not carryover funding beyond current Option period
  - F&E and RE&D may be obligated during 3-year period
  - Ops may be obligated during 2-year period

Pre-Award Communications

- Engagement Team will provide each customer a status update on a weekly basis
- A revised TO award schedule will be distributed to the Customer for planning purposes once the TO RFP is released
- Customer may contact the Engagement Advisor to request the latest status update at any time

SharePoint Access

- SharePoint access will be provided to the Technical Customer during the Pre-Award process a few weeks prior to award
- SharePoint Training slides will be provided by the Engagement Team
- Technical Customers can access the awarded Task Order and TC Nomination Form via SharePoint

Technical Customer Orientation Training

- SETIS Technical Customer Orientation Training Class conducted quarterly
- Register thru eLMS: Course# FAA30202917
- Course outcomes include:
  - Understanding of Technical Customer roles/responsibilities
  - Understanding of basic Contractor Performance Monitoring
  - Understanding of Invoice Payment process
  - Understanding of Deliverables Acceptance purpose and process
  - Understanding of Resume Approval process
  - Understanding of approval of Contractor Training, Travel and ODCs
  - Understand key concepts of Appropriations Law related to contract funding

Vendor Applicant Process (VAP) Requirement

- Only contractors who require routine physical access to an FAA facility, access to the FAA network, or access to FAA SUI information need to be submitted into the VAP system to complete the background investigation process
- TC identifies labor categories requiring a VAP as part of the PWS development
- Upon Task Order award the vendor will receive instructions from the COR regarding which contractors must be submitted into the VAP
- Investigation timelines can vary and may take multiple weeks, so recommend planning for TO award four weeks prior to TO Start Date
- VAP process averages approximately 4 weeks

Task Order Competitions

Task Order Award Approach

- CO determines Acquisition Strategy for each TO on a case-by-case basis
- Competitive Award is the preferred acquisition strategy
- TO Award based on Best Value to the FAA considering both technical merit and price
- Solicitations distributed to all vendors (either as a Small Business competition or as a Full and Open competition for both Small and Large Business vendors) with one proposal allowed for each Prime vendor
- Enables Customers to evaluate multiple proposals and determine the best technical approach
- Technical Proposal typically limited to 2 pages for every 1 page of PWS requirements; however, Customers may consider reducing proposal content by specifying discriminators based on the most important aspects of the PWS rather than the entire tasking
- Staffing Plan and requested resumes – note Key Personnel resumes are evaluated with respect to Tasking Requirements and approved with Proposal award
- CO independently evaluates vendor price proposals for completeness, reasonableness and realism

Task Order Evaluation

- Evaluation Templates and examples simplify the evaluation and speed up the award
- Customer identifies the Technical Evaluation Team – consisting of a minimum of 3 non-conflicted FAA Employees with additional advisors as needed – at least 1 person must have experience completing technical proposal evaluations
- Each Technical Evaluator needs to dedicate the time needed to conduct the technical proposal reviews – generally 1-2 weeks to independently review each proposal and another 1-2 weeks to conduct a team consensus review meeting and draft an evaluation report (additional time will be required to support report reviews and revisions with the CO and Legal)
- Technical Evaluation Team is strongly encouraged to plan and align schedules with conflicting assignments minimized and work priorities discussed with TET Chairperson and the Evaluator's Manager prior to starting the evaluation
- Contracts Team is available to conduct a follow-up meeting to answer questions, review initial direction, and ensure TET understands how to complete the evaluation

Technical Evaluator Training

- FAA Source Selection (Instructor Led) training class
  - First time proposal evaluators are strongly encouraged to attend this class to get a general approach to FAA Source Selection. The SETIS CO will provide dedicated source selection training as a first-time evaluator under SETIS.
  - Register thru eLMS: Course# FAA30010026
- Course outcomes include:
  - Describe the FAA source selection process
  - Understand the use of a more structured source selection approach
  - Develop evaluation factors and scoring plans based on knowledge of AMS policy and guidance
  - Understand the proposal evaluation process and your respective role
  - Evaluate Technical Approach proposals strengths, weaknesses, and risks
  - Identify and recommend a source selection award decision

Acquisition Strategy Review Board (ASRB)

- ACQ-1 Policy applies to all FAA support service requirements **$10M and above**
- Assure selection of the best contract vehicle to meet the agency's needs for support services and complements the CFO review process
- Contracting Office develops ASRB package and briefing based on finalized PWS, IGCE, TC Input for T&M Determination Form (if required), CIO Authorization form (if required), and fully released PR
- Finalized PWS, IGCE and fully released PR required to develop ASRB package and briefing
- Briefing conducted by the CO to the ASRB Board members

Contract Type

- Contract type is determined by the CO
- All SETIS TO awards must be awarded as Firm Fixed Price (FFP) / Firm Fixed Price-Level of Effort (FFP-LOE) per EO 14402 dated April 30, 2026

Post Award Administration

Post Award Support

- Dedicated COR provides post-award support
  - Proactive TO Administration
  - Maintaining Financial Records
  - Invoice Acceptance
- Monthly contract status reports provided to customers
- TO Performance Management with PBCM and CPARS (above $2M)
- New Mod Request form
  - Specifies the impacts of the Mod to ensure all required changes are identified
  - Comprehensive to ensure requirements are clearly understood
- SharePoint Deliverables Tool formalizes review and acceptance of contract deliverables
- Acquisition planning and forecasting
- Customer satisfaction and feedback

Performance Based Contracting

- All Task Orders operate under Performance Based Contracting principles
- Task Order requirements are defined in a Performance Work Statement (PWS)
- Each PWS includes a Quality Assurance Surveillance Plan (QASP)
- TCs are required to evaluate vendor performance on a quarterly basis using an information tool keyed to the QASP
- Vendor performance issues are directed to COR and CO for resolution

Background Information

SETIS Prime Vendors – Small Business

A3 Technology

Location: Egg Harbor City, NJ

Team Members:

- ABCx2, LLC
