

ATO Cyber Day

Integration, Outreach, and Planning (IOP)

By: Steven Oliver

**Federal Aviation
Administration**

Integration, Outreach, and Planning

MISSION

- To be consistently ahead of threats and risks to the aviation ecosystem through successful integration, outreach, and planning efforts

Integration, Outreach, and Planning

INTEGRATION - Integrating cybersecurity best practices into all phases of the system development lifecycle (SDLC)

- Integrating cybersecurity best practices with Safety Risk Management (SRM)
- Integrating cybersecurity with NAS Operational Maintenance and Support
- Incorporating cybersecurity into Operational Risk Management

Integration, Outreach, and Planning

OUTREACH – *Promoting the ACG as the “one stop shop” for all ATO cybersecurity services*

- Coordination with internal FAA stakeholders to improve customer focus, communication, collaboration, and best practices
- Engagement with external stakeholders to improve partnerships and participate in cybersecurity exercises
- Improving the security posture of ATO systems to help facilitate the convergence of integrated cybersecurity capabilities across the aviation ecosystem

Integration, Outreach, and Planning

PLANNING – *Ensuring that technologies and capabilities can be integrated, authorized, and supported by the ACG*

- Establish enterprise cybersecurity requirements, procurements, metrics, schedules, and contracts
- Ensure cybersecurity policies and processes align with Federal standards and guidelines (i.e NIST)
- Integrate cybersecurity activities and initiatives across the ATO to maximize efficiency, consistency, and effectiveness
- Ensure new technologies and/or capabilities such as Cloud are planned for and authorized

Integration, Outreach, and Planning

FUNCTIONAL AREA OF RESPONSIBILITY

- The IOP team works closely with internal and external partners in government and industry to secure and protect ATO systems and networks
- The IOP team works to improve and expand risk management, best practices, information sharing, collaboration, and partnerships
- The IOP goal is to improve the cybersecurity posture of the ATO, the NAS, and the Aviation Ecosystem
