

FY-2018 Airport Improvement Program Supplemental Appropriation

Airports eligible for "Priority Consideration"

Please note that inclusion on this list is not a guarantee—individual proposed projects must be eligible and justified in accordance with the FAA's authorizing statute (Title 49 USC Chapters 471 or 475). In addition, please note:

- Not all of these airports have eligible and justified projects that have been through the planning and associated processes.
- Some of these airports are just beginning to update their master plans and it may be quite some time (measured in years) before certain airports are in a position to accept development grants.
- The FAA is currently reviewing potential compliance issues at some of these airports, and in such cases the FAA may not be in a position to award grants to certain airports.
- The FAA is required to maintain a plan of public-use airports. Part of the planning process is to identify, annually, each airport's role in the system based on activity (e.g., enplanements, based aircraft, etc.). While the number of airports remain largely unchanged from year to year, the FAA reviews and validates the each airport's classification at the beginning of the fiscal year.
- These lists are current as of April 30, 2018. However, by the end of FY-2018, the FAA must publish a new NPIAS Report, and several airports are likely to be reclassified as a result. Some of the airports shown on these lists today may no longer meet the criteria as of October 1, 2018—and likewise, several airports that don't meet the criteria today may meet the criteria under the new NPIAS Report.

Summary by state (airports meeting criteria for "Priority Consideration")

As of April 30, 2018

Subject to change when new NPIAS Report is published September 30, 2018

States	Nonprimary	Primary	Totals
