Explanation of Terms and Abbreviations Used in Appendix A

City - The city generally associated with the airport.

Airport - The official name of the airport or designated abbreviation.

LocID – The unique airport location identifier for an airport.

Role - One of four basic airport service levels which describe the type of service that the airport **currently** provides to the community and is anticipated to provide the community at the **end of the 5-year** planning period. The service levels also represent funding categories for the distribution of Federal aid. New airports opening beyond the 5-year period are not shown in Appendix A; however, 5-year costs associated with the development are included in Table 8 of the NPIAS Report Narrative.

PR	Commercial Service - Primary
CM	Commercial Service - Nonprimary
RL	Reliever Airport
GA	General Aviation Airport

Enpl - The number of revenue passengers expected to be boarded at the airport during the fifth year of the 5-year planning period.

Based Acft - The number of locally owned aircraft expected to be hangared or based at the airport at the end of the 5-year planning period.

Cost - The estimated 5-year costs for airport improvements that are eligible for Federal development grants under the Airport Improvement Program. The costs identified are for development only; approximately \$149 million in planning costs are excluded from the development estimates.

NOTE: The data presented in these tables were compiled as of January 2001. Current data for specific airports can be obtained from the appropriate regional office.
