

Appendix A: List of NPIAS Airports with 5-Year Forecast Activity and Development Cost

EXPLANATION OF TERMS AND ABBREVIATIONS USED IN APPENDIX A

City	The city generally associated with the airport.
Airport	The official name of the airport or designated abbreviation.
LocID	The unique airport location identifier for an airport.
Ownership	Indicates airport ownership: PU Public PR Private M Military (Army, Navy, Coast Guard) NA Native American
Hub	The term “hub” is used by the FAA to identify very busy commercial service airports as measured by passenger enplanements. Primary commercial service airports are grouped into four categories. Large hubs are those airports that each account for at least one percent of total U.S. passenger enplanements; medium hubs for between 0.25 percent and one percent, small hubs for between 0.05 percent and 0.25 percent; and nonhubs for less than 0.05 percent of all enplanements, but more than 10,000 annual enplanements. L Large Hub M Medium Hub S Small Hub N Nonhub
Asset Categories	Facilities serving mostly general aviation operations were placed in categories based on current activity measures (e.g., number and type of based aircraft and volume and type of flights). There are four categories: National, Regional, Local and Basic. Airports that could not be placed into one of the four categories, which are referred to as “not classified” are shown in Appendix A as “Other.”
Svc Lvl	One of four basic airport service levels which describe the type of service the airport currently provides to the community and is anticipated to provide at the end of the 5-year planning period. The service levels also represent funding categories for the distribution of Federal aid. New airports planned to open beyond the 5-year period are not shown in Appendix A; however, any 5-year costs associated with the development of these airports are included in Table 9. P Commercial Service – Primary CS Commercial Service – NonPrimary R Reliever Airport GA General Aviation Airport

<i>Enplaned</i>	The number of revenue passengers forecast to board aircraft at the airport during the fifth year of the 5-year planning period.
<i>Bsd Acft</i>	The number of aircraft hangared or based at the airport. Included in these counts are single engine, multiengine, jets, and helicopters as reported by the airport and verified by the N number registry. Not included in these totals are military aircraft, ultra-lights, gliders, and balloons.
<i>Dev Cost</i>	The estimated 5-year costs for airport improvements that are eligible for Federal development grants under the Airport Improvement Program. Note that costs associated with planning (master plans, regional and State system plans, and environmental studies) are not captured in the total. For the 5-year period covered by this report, planning costs total \$774 million.
<i>Note</i>	The development presented in these tables were largely compiled in 2011 with updates through February 2012.

State Summary
