RUNWAY INCURSION MITIGATION (RIM) PROGRAM
INVENTORY OF AIRPORT LOCATIONS

The FAA developed this inventory of airport locations where runway incursions (RI) have occurred, and is now working with airports on mitigation strategies. The data collected indicates airport locations where three or more peak annual RIs occurred in a given calendar year or where cumulative incursion counts averaged one or more RIs per year of data analyzed. Cumulative RI counts reflect total RIs to date since FY 2008 for each location validated prior to 2020. For locations validated in 2020 and later, cumulative RI counts reflect total RIs beginning 10 calendar years prior to validation year. This information is subject to change as the FAA works with the airport sponsors. The FAA updates this inventory as necessary as mitigation projects proceed and additional data are collected on RIs. Runway incursion data is as of June 2026.

Airport Name	Location	Location Identifier	Year Added to RIM (Validation Year)	Region	NPIAS Hub Classification	Asset Cat	Part 139	Cumulative RI (Pilot & Vehicle/Pedestrian Deviations)	Peak CY Annual RI (Pilot & Vehicle/Pedestrian Deviations)
