Email: jim.price@faa.gov

1. Purpose.

This CertAlert announces the availability of a new Fluorine Free Foam (F3) training video for ARFF departments transitioning to F3.

2. Background.

The FAA has produced a short video presentation for airport ARFF departments to use during training and familiarization of F3. The video provides information and best practices for the use of F3 products and highlights the differences between Aqueous Film Forming Foam (AFFF) and F3.

3. Additional Information.

Airport operators should take the time to review the contents of this video, which provide helpful guidance on application techniques and procedures, to make the most of the F3 benefits.

The video can be found on YouTube and the FAA F3 transition page:
