Federal Aviation Administration
National Part 139 CertAlert

Date:	8/18/2016	**No. 16-04**
To:	**All Title 14 CFR Part 139 Airport Operators**	
Subject:	**Informational Webinars on Airport Condition Reporting and the Runway Condition Assessment Matrix (RCAM)**	
Point of Contact:	Phillip Davenport, AAS-300, 202-267-7072 Email: Phillip.Davenport@faa.gov	

1. Purpose. This CertAlert announces the dates and times for webinars for airport operators and other stakeholders about the new process for assessing and reporting surface conditions using the assessment tool known as the Runway Condition Assessment Matrix (RCAM). The webinars will also provide some information about how assessments will be completed and reported in the Federal NOTAM System.

2. Background. The recently published Advisory Circular 150/5200-30D, *Airport Field Condition Assessments and Winter Operations Safety*, dated 29 July 2016, provides updated guidance on assessing and reporting airport surface condition information through the use of a new assessment tool referred to as the RCAM. To further facilitate this change, the Federal NOTAM System will incorporate these reporting procedures beginning October 1, 2016. This new process will also serve to standardize the terminology and method by which airport surface condition information is disseminated.
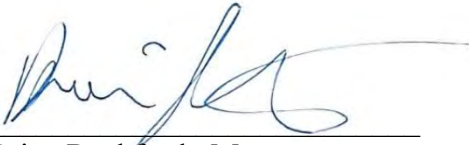

3. Action. Airport operators and other interested stakeholders should register and attend one of the listed webinars.

Airport Condition Reporting/Runway Condition Assessment Matrix Webinars
