

COVID-19 Impact on FAA Research & Development Programs

Research, Engineering and Development Advisory Committee
July 9, 2020

FAA

Objective

Hold a preliminary discussion on
Research and Development Programs
and possible impacts due to COVID-19

FAA

Next**GEN**

COVID-19

FAA Priorities

- Ensure the safety of all users of the National Airspace System (NAS) and the flying public.
- Ensure the safety and well-being of the FAA work force while continuing to operate the NAS efficiently, safely, and securely.
- Support the U.S. Government response efforts.

FAA

Research & Development: COVID-19

FAA Priorities

- Ensure the safety and well-being of the FAA work force while continuing to operate the NAS efficiently, safely, and securely.
 - Employees
 - Facilities
 - Programs

Aeromedical Factors

Next Steps

FAA anticipates that as the COVID-19 situation evolves, new schedule and funding challenges will arise:

- FAA will continue to gather, track and monitor R&D program information
- FAA will continue to review financial data to evaluate planned vs actual activities
