

Airspace Traffic Scope

To protect the airspace, mitigate risk and to provide situational awareness a traffic avoidance tool is utilized.

- **A transponder driven traffic scope.**
 - This device displays all transponder equipped traffic within 5 miles and 5000 feet of the airspace.
 - It has both a picture display and audible alerts.
 -
- This device will detect and alert the pilot/operator of any transponder equipped traffic in the area. This device adds to the safety of the overall mission.
