

Lost Link / Mission Procedures:

Upon loss of link for a predetermined amount of time (30 seconds), the UAS should be programmed to proceed to Point Baker (North UA Zone) located at the junction of Baker Road and Wilson Road (EG 9230 9960 or N 37 56 22 W 85 57 00). Point Saunders (South UA Zone) is located at the apex of 7th Armor Division Road and 7th Armor Division Road Cutoff (EG 9415 9100 or N 37 51 42 W 85 55 47). UAS will remain at or below 1300' MSL inside R3704 and orbit in an attempt to regain the signal. If the link is not re-established, the UAS then will loiter until fuel starvation followed by automatic parachute deployment which floats the UAS to the ground. In the event of lost link, operators are equipped with VHF/UHF communications, cell phone and maintain contact with Godman ATC Tower, (502) 624-1717/7513. Godman Tower will be informed immediately of lost link and upon recovery of the UA. Position reports will be relayed to ATC upon request.
