Operational Description	Requested Effective Period	Beginning	
		End	
		Light out operation	No
		VFR operation	Yes
		IFR operation	No
		Day operation	Yes
		Night operation	No

		Program Executive Summary	The US Army Aviation Applied Technology Directorate, under the US Army Research, Development and Engineering Command, is requesting a continuation of the Certificate of Authorization for the Vigilante Vertical Take of and Landing (VTOL) Unmanned Aerial System (UAS). AATD has been conducting flight operations with the Vigilante VTOL UAV at Felker Army Airfield (FAF) in Ft. Eustis, VA, since 2003, and has logged hours at many other locations including Ft. Pickett, Aberdeen Proving Grounds, Yuma Proving Grounds, and West Point Municipal Airport (prior to COA requirements). The Vigilante VTOL UAV is a 1100 lbs class Rotorcraft UAS acquired by AATD to use as a testbed for demonstrations of various UAS technologies. To date, those technologies have included 2.75" rocket launches, various imaging packages, and an upcoming test for an autonomous sniper rifle turret. All flights at Felker are issued an Airworthiness Release from an AATD Safety of Flight Review Board, and strict rules of operations are issued in these releases. The COA is being requested to conduct currency flights on the Vigilante UAS, as well as demonstration flights on the aircraft to demonstrate various UAS technologies and payloads. These demonstrations permit quicker and lower cost fielding of the various UAS technologies being demonstrated by providing a readily available test asset to fly on at a relatively low cost compared to Army Program of Record Aircraft.
		Operational Summary	Vigilante operations will occur at Ft. Eustis on at least a monthly basis to maintain operator and aircraft currency. Currency flights will last approximately 2 hours, during which time, the ATC will issue a Notice to Airmen (NOTAM) the operations area as closed to all other traffic. The operations area for the Vigilante UAV is basically the Flight Pattern area South of the Runway at FAF (See section 15 for more detail)at or below 500'. Vigilante operations occur during daylight hours on a test-by-test basis to demonstrate various UAS technologies planned for integration on the Vigilante UAS. These operations will be issued Airworthiness Releases. Depending on the system being demonstrated, the operations can last anywhere from a couple of hours, to several hours a day for several weeks.

		Unique Trained Pilot Description	Observers are trained in accordance with Army / DOD standards.
		DOD certified/trained	Yes
		Other Certified Training	Yes
		Trained on FAR Part 91 Requirement	Yes
		DOD Certified Training Attachment	0
		Medical Certification Class (FAA or DOD equivalent)	3
		Currency Status	Observers maintain currency in accordance with Army / DOD standards.
		Duty Time Restrictions	8 hours
		Single UAS Control	Yes
		UAS Description	Observer duties include watching for unexpected air and ground traffic, unexpected flight maneuvers, and flight operations heading out of bounds. Observer is responsible for notifying test director & UAV operator of issues. Equipped with handheld radios for Comms w/ Test Team, and Cell Phones for back-up comms. Only one UAV operating at a time is permitted in the designated airspace.
		Total Numbers of UAS Controlled	0
Special Circumstances		Special Circumstances	COA is a renewal. Operation are conducted at or below 500'.
