

## Communication

Communication uplink command to the UAS vehicle, and data downlink is provided by the systems described in the following table:

VEHICLE/PAYLOAD/GROUND RF TRANSMITTERS:		
System 1: JR 10X or JR 12X Radio Controller	Frequency 72MHz / 2.4GHz	Power (Watts): 125mW  Gain: NA – standard ½ or ¼ wave dipole antenna
System 2: Autopilot-to-ground station comm. link	Frequency (MHz): 900S	Power (Watts): 100mW  Gain: NA – standard ½ or ¼ wave dipole antenna
