

Airworthiness Public

The “suite” of AirSTAR Project UAS vehicles is maintained to airworthiness standards for experimental aircraft by the NASA Langley Research Center Airworthiness and Safety Review Board (ASRB) in accordance with LPR 1710.16 Aviation Operations and Safety Manual. The Chairman of the ASRB is (b) (6) 757-864-7069. The list of vehicles (see attachment files) is covered by the NASA ASRB Flight Safety Release. Documentation providing Flight Safety Release is presented in the attachment files.
