

## **Communication and Lost Communications Description**

### **NASA DFRC Ikhana Local Area UAS COA Application Attachment**

NASA Dryden Flight Research Center (DFRC) has procured from General Atomics – Aeronautical Systems Incorporated, an MQ-9 Reaper aircraft and a Ground Control Station (GCS). DFRC has assigned the number “NASA 870” to the aircraft and renamed it “Ikhana” (pronounced ee-kah-nah, a Native American word from the Choctaw Nation meaning intelligent, conscious, or aware).

This attachment covers the communication between the Ikhana pilot in the GCS, and ATC. The NASA Ikhana Local Area - Mission and Lost Link Procedures Description attachment covers communication/lost communication (“lost link”) between the Ikhana pilot in the GCS and the aircraft.

#### **1. Communication Procedure –**

- 1.1. All flights will be in communication with ATC.
- 1.2. Voice communications between the pilot and ATC shall be as directed by the responsible ATC facility.
- 1.3. Direct voice communication between the pilot and ATC will be accomplished through the UHF/VHF relay system on-board the aircraft with the backup being a land phone line between the GCS and ATC. The relay system on board the aircraft will introduce a few seconds delay in voice communications.
- 1.4. NASA DFRC will prepare a phone list pre-mission that includes prime and backup phone numbers for the FAA facilities involved.
- 1.5. ATC directed frequency changes will be performed in the same manner as manned aircraft operations.

#### **2. Loss of Communication Procedure –** In the event of a loss of voice communications with ATC, it is the intent of the pilot to reestablish contact with ATC as quickly as possible to ensure the safety of other aircraft in the NAS.

- 2.1. The pilot will first attempt to contact the appropriate FAA facility supervisor using the pre-mission developed phone list.
- 2.2. The pilot shall notify the appropriate FAA facility supervisor of his intent to land at either Edwards AFB within R-2508/R-2515 special use airspace (SUA) or Gray Butte Field (04CA) or El Mirage (99CL) airports as soon as practicable.
