

## Procedures-Lost Link/Mission

The aircraft is normally controlled by the primary pilot through the 72 Mhz link. The primary pilot can give and take control to the research pilot. The research pilot controls the aircraft through the 900 Mhz link. When the 72 Mhz link is lost, the control automatically goes to the 900 Mhz link. Likewise, when the 900 Mhz link is lost, the control automatically goes to the 72 Mhz.
