This TUAV Shadow 200 Checklist has been rewritten to meet the requirements of an Aviation Checklist IAW

MIL-PRF-63029F (AV)

Manuals, Technical: Requirements for Operators Manuals and Checklists for Aircraft

This Checklist is to be used with all configurations of the TUAV Shadow 200 systems.

This checklist is a condensed and highly abbreviated version of the following Operator's Manuals:

DTM 9-5895-681-10

DTM 9-5895-XXX-10

DTM 9-5895-YYY-10

DTM 9-5895-ZZZ-10

Multiple sections of the previous checklists have been deleted to comply with the MIL-PRF. This checklist is limited to Normal Procedures, Emergency Procedures, and Performance Data.

The procedures in this checklist are AVO tasks unless otherwise specified by a parenthetical identity at the end of the procedural step, i.e.:

(Crew) = Crew Task

(CC) = Crew Chief Task

(All) = All Personnel

(MPO) = Mission Payload Operator

(RS) = Receiving Station

(TS) = Transmitting Station

Symbols new to this checklist can be found on page ii under CHECKLIST SYMBOLS. It is recommended that all users of this checklist read and become familiar with these symbols before attempting to use this checklist for flight operations.

The "reverse bold" symbols (G1, G2, G3, 1A, & 1B) preceding a step indicate that the step is only applicable to a particular group of GCS's or to a particular AV. No "reverse bold" symbol indicates that this step applies to all system configurations.

This page is included for informational purposes only and is not part of this checklist. After reading and understanding this information, this page can be removed and discarded.
