## Section 3: MCEB GUIDANCE

1. The enclosed application is approved for operational use at the above locations subject to the guidance provided in the following paragraphs.

2. For the intended use in the Aeronautical Mobile and Aeronautical Fixed service, the subject equipment is not in accordance with the US and ITU Table of Frequency Allocations over its tuning range. Operations will be on an unprotected, non-interference basis to the established services at the above locations.

3. The provisions of NTIA manual Sections 5.2 and 5.3.3 are considered applicable to the operation of the subject equipment. Based on the information provided, the subject equipment does comply with NTIA Manual Sections 5.2 requirement for frequency tolerances and unwanted emissions and, Section 5.3.3 requirement for spurious, and harmonics emission levels, unwanted emissions bandwidth and receiver's IF selectivity and spurious rejection. In any instance of harmful interference caused by nonconformance with these provisions, the responsibility for eliminating the harmful interference normally shall rest with the agency operating in nonconformance.

4. The subject equipment does not comply with the requirements of

MIL-STD-461E for harmonic levels. Compliance is not mandatory but the standard may be used as a design objective.

5. Frequency assignments request must be submitted using Standard Frequency Action Format (SFAF) and coordinated with the cognizant area frequency coordinator in accordance with ACP 190 US SUPP-1 (C), Guide to Frequency Planning, prior to activation.

6. Coordination with the NTIA Spectrum Planning Subcommittee was requested.

7. Operational use within the appropriate theater commands outside the United States has not been approved. Approval for operational use in the intended deployment area requires appropriate CINC's statement(s) that the subject system has been deemed frequency supportable.
