**TAAC Air Show Lost Communications Procedure**

UHF link – FAA IIC, TAAC Air Boss, TAAC Mission Commander/UAS PIC, TAAC Primary Observer, TAAC and Situational Awareness Monitors will be on one link to ensure safety of flight, ground safety, and coordination of the air show. If this link cannot be maintained and no back-up exists, the flights will cease for safety reasons.

As discussed with UAPO ASI Marcello Mirabelli, UAPO has a extensive knowledge of the systems and did not need specific procedures on each system.
