

## SPECTRUM ANALYSIS APPROVAL

Time did not allow the NMSU UAS Program to obtain the required Spectrum Analysis Approval prior to submitting the 2010 TAAC Conference COA Application. Coordination to obtain the necessary Spectrum Analysis Approval will be conducted with the FAA's Southwest Region Spectrum Management Office (ASW-473) to obtain approval for the spectrum that will be used for the flight operations of the six micro/small unmanned aircraft and downlink of any data.

NMSU shall ensure no flight operations are conducted for any UAS that does not have spectrum use authorization from ASW-473. As soon as the approval has been obtained the appropriate document will be forward to the FAA UAPO.
