Las Cruces, New Mexico 88003

Dear Mr. Zaklan:

This office has reviewed your application for Certificate of Waiver and Authorization for the event at the Tamaya Resort on December 7-9th. Unfortunately, at this time our office is unable to approve your request.

As discussed on Tuesday, November 16th, the limiting factor is that your application for Certificate of Authorization from Air Traffic Office has been denied for unacceptable high risk.

Additionally, your FAA Form 7711-2 application has areas that are not in compliance with FAA Order 8900.1, Volume 3, Chapter 6, Issue a Certificate of Waiver or Authorization for an Aviation Event. Some of the areas that need to be addressed are: airworthiness of aircraft, pilot and observer qualifications and currency, Class III crowd and show lines, markers, emergency vehicles and facilities, and emergency access surface routes to and from the event.

Should you reapply, please review the guidance at www.fsims.faa.com. While reviewing the guidance, if you have any questions, please call Inspector Bell at (505) 764-1218 and she will be happy to assist you.

Please remember that without an approved COA, we will be unable to approve your request for the Tamaya event.

Sincerely,

John M. Wensel
Manager
