EMERGENCY PROCEDURES

Aeronautics Defense Systems has developed guidelines and checklist for both the Aerostar UA internal pilot (IP) and external pilot (EP) identifying potential emergency situations and actions to be initiated to resolve a particular emergency. Yet, since there are a myriad of emergency conditions that can develop, the Aerostar UA pilot shall employ his/her knowledge, expertise, and skills to resolve the emergency as safely and quickly as possible. When resolving emergencies the emphasis shall be on the safety of others more than meeting mission goals or attempting to land the Aerostar UA with minimum damage. ATC, as appropriate, shall be informed of the emergency situation as early as feasible and advised of what flight actions are being performed to resolve the emergency. As continued management of the emergency permits, ATC shall be periodically updated on the emergency situation as the Aerostar UA's flight capabilities or operational events change.
