

**Memorandum of Agreement
for**

**Low Altitude Authorization and
Notification Capability (LAANC)**

Between

FEDERAL AVIATION ADMINISTRATION (FAA)

And

B4UFLY Addendum

March 2024

Version 1.1

B4UFLY is a free service that provides recreational UAS pilots with information regarding airspace awareness for their operations. USSs have the option to provide this service to UAS pilots.

The rules and requirements are described in the LAANC Performance Rules, which are hereby incorporated as an attachment to this Agreement. The applicable version of the LAANC Performance Rules is the most recent version approved by the FAA and directly or constructively provided to USS; this includes versions approved and provided after execution of this Agreement. Article 2.3.9 describes the process for updating the LAANC Performance Rules.

By signing this addendum, the USS agrees to provide B4UFLY to recreational UAS pilots and follow the rules and requirements in the LAANC Performance Rules.
